

Prof. Cheol-Ho Jeong

Technical University of Denmark

Bio-sketch

Cheol-Ho Jeong holds his BSc (2000), MSc (2002), and PhD degree (2007) in Mechanical Engineering from KAIST, South Korea. Cheol-Ho Jeong is currently associate professor at the acoustic technology section, department of electrical engineering, Technical University of Denmark (DTU). He actively researches computational room acoustics and virtual acoustics, acoustic boundary modeling and characterization, sound field characterization, model order reduction and data-drive techniques like scientific machine learning methods, multi-modal perception evaluation, environmental acoustics, and acoustic metamaterials. He has published 60+ ISI-indexed journal articles and 120+ conference papers.
